Summary

I am a results-driven Game Developer with 4+ years of experience specializing in high-performance 2D engine architecture and complex logic-driven gameplay. Successfully architected and deployed 20+ professional Slot Games (e.g., Voodoo Jackpot, Ape Emperor, Dinosaur Cash, Supreme Treasure, Lucky Panda, Lucky Fortune Big Bonus.) using PixiJS. Expert in GLI Certification processes, and advanced gaming mechanics like Wheel Bonus, Free Spins, Multiplier, Community Jackpot, Blasting Reels and Progressive Jackpots. Proven track record of optimizing rendering pipelines and integrating real-time RESTful APIs for seamless user experiences. I have successfully led front-end development for multiple projects, where I managed requirements, mentored junior developers, and delivered high-quality gaming experiences on schedule. I continually explore new tools and frameworks to deliver cutting-edge entertainment experiences.

| ➤ CSS | ➤ Communication |
| ➤ JavaScript | ➤ Team collaboration |
| ➤ GSAP | ➤ Multitasking |
| ➤ .Net Core | ➤ Cross-platform development |
| ➤ C# Programming | ➤ Game performance optimization |
| ➤ REST API Integration | ➤ Git |
| ➤ PixiJS Tweens | ➤ Leadership |
| ➤ CI/CD | ➤ Problem Solving |

Experience

Senior Software Developer (PixiJS) Chetu Inc.

09/2024 to Present
Noida, India

Architected and optimized a high-performance **Unified Game Lobby** using PixiJS to host and manage **52+ legacy titles**. Engineered 10+ premium slot games including *Voodoo Jackpot* and *Dinosaur Cash*, focusing on **GLI certification** standards, optimized rendering pipelines, and seamless integrated routing systems.

- Developed Interactive 2D game and create game Lobby in Pixi JS for Hosting Games and Integrated Routing.
- Developed games i.e. Voodoo jackpot, Dinosaur cash, Utah Fortune, Supreme Treasure, Yucatan Quest, Ape Emperor, Purple Nation, Bahama Rock, Panda Quest, Talisman and Hillside Manor game.
- Collaborated with QA, designers, and backend engineers to integrate APIs and real-time data, ensuring seamless synchronization across devices.

- Implemented responsive design and adaptive layouts, improving accessibility and gameplay consistency on both desktop and mobile platforms.
- Demonstrated project progress to clients and project managers on a weekly basis, ensuring alignment with project goals.
- Optimized game performance by refining rendering pipelines and asset loading, resulting in faster load times and smoother gameplay.
- Collaborated with the GLI (Gaming Laboratories International) Team and clients to achieve formal Game Certification.
- Successfully integrated 52 legacy games into a newly developed, unified Game Lobby.
- Developed advanced gameplay features such as Free Spins, Blasting Reels, and Blazing Reels.
- Engineered complex mechanics including Sticky Wilds, Falling Wild Re-Spins, and various Bonus Game features.
- Integrated Sprite Sheet and Spine Animations seamlessly to enhance visual fidelity and performance.
- Debugged and resolved critical rendering and logic issues, significantly reducing player-reported bugs during testing phases.

Software Engineer (PixiJS) **Chetu Inc.**

02/2022 to 08/2024
Noida, India.

Led the end-to-end development of 10 interactive 2D slot titles from scratch using PixiJS and JavaScript. Developed a custom C# Math Engine and Console Application to simulate and verify Return to Player (RTP) percentages, ensuring 100% mathematical accuracy across all titles.

- Developed a robust Math Engine for 10 Sweepstake games, handling complex probability calculations and payout structures.
- Engineered a Console Application to simulate and verify Return to Player (RTP) percentages, ensuring mathematical accuracy for 10 distinct game titles.
- Developed interactive 2D game interfaces and animations using PixiJS, significantly enhancing visual engagement and player experience.
- Built 10 high-performance 2D slot games from scratch using PixiJS, JavaScript, and HTML5/CSS3.
- Engineered complex mechanics such as Fever-Re-spin, Sticky Wilds, Falling Wild Re-Spins, and Diamond Multipliers.
- Implemented advanced game logic including Ways Selection, Jackpot Selection, and various interactive Bonus Wheel features.
- Initiated early defect detection during the design and build phases through proactive risk analysis, reducing overall project costs.
- Performed comprehensive root cause analysis of defects in pre-production environments to prevent bug propagation.
- Developed and integrated "Community Jackpot" features to enhance player social interaction and retention.
- Collaborated with cross-functional teams to gather, analyze, and implement complex client requirements effectively.
- Executed clean, efficient, and maintainable code following industry best practices for PixiJS and JavaScript development.
- Performed rigorous unit testing and debugging to ensure optimal software performance and maximum rendering optimization.
- Participated in peer code reviews to maintain high code quality standards and identify architectural improvements.
- Integrated RESTful APIs and parsed complex data responses to dynamically manipulate and display real-time game data on the front end.
- Developed a comprehensive Game Management Portal to manage the complete business hierarchy, including Owner, Admin, Distributor, Agent, and Store levels.
- Engineered features to dynamically enable/disable games at the store level and integrated a Weekly Purchase Limit feature using .NET MVC for better financial control.

- Built and maintained a POS (Point of Sale) Application to manage game reports, player history, cashier transactions, and real-time financial tracking.
- Implemented essential cashier features including creating mobile IDs and PINs for new customers, adding play-credits, and processing amount redemptions.
- Developed operational tools within the POS system such as Shift Reports, and functionalities to add or edit store configurations seamlessly.

Project: Lucky Fortune Big Bonus Game

- Developed a 3x5 reel Built Loading Screen while game assets load in background.
- Integrated API Response to Show Winnings and Paylines.
- Implemented Feature like Free Spins, Feature Wild, Up & Up Feature, Community Jackpot, Auto Spin.
- Implemented Skills like Tic Tac Toe, Puzzle, Meter Skill.
- Implemented Seamless Animations including Spine, Sprite sheets and gasp Library.
- Implemented Audio and synchronize them with the game functionalities.

Project: Lucky Duck

- Developed a 1x5 reel Built Loading Screen while game assets load in background.
- Built **Wheel Spin** feature, **Multiplier Win** Feature, **Super Wheel**, **Jackpot Win** Features of the game.

Project: Lucky Panda

- Developed a 3x5 reel and Built Loading Screen while game assets load in background.
- Implemented Fever Re-Spin Features, Grand Jackpot Feature, Free Spin Feature of the game.
- Integrated Skills for win deduction after selecting incorrect answer.

Project: Golden Prosperity

- Integrate Pay table, Winning amount addition in entries while entries is less for spin.
- Implement features like Activate Golden Symbols, Free Spin, Free Spin game Selection, Jackpot Games.
- Implemented Seamless Animations like character, background animation including sprite sheet.

Education		
•	Master of Computer Applications (MCA) – Computer Application <i>Indira Gandhi National Open University, New Delhi</i>	2022-2024 <i>New Delhi</i>
•	Bachelors of Computer Application (BCA)- Computer Science <i>Dr. RML Avadh University, Ayodhya .</i>	2018- 2021 <i>Uttar Pradesh</i>
